FIRE CHIEF B. A. BONSER REPORTS:

The year 1982 was a productive and rewarding year with new programs and activities resulting in a reduction in the fire loss. Credit must be shared by all members of the Department, in every Division, as the result of our attack on the fire problem was truly a team effort.

The P.I.P. Program that was introduced in 1982 to gather information for pre-fire planning and to ensure compliance with the requirements of the Ontario Fire Code was successful beyond expectations,and crews with personnel who combine fire suppression and fire prevention skills will expand this effective and worthwhile program in future years.

On November 1st, 1982, the Toronto Fire Department formed a "High Rise Task Force" with resource personnel assigned on a full time basis to conduct an in-depth study on the problems relating to high rise fires. The Task Force will monitor the proceedings of the Ontario Royal Commission Inquiry on High Rise Fires as well as studying current and future policy of the Department on tactics, strategy, logistics and training for high rise fires. The study should be complete by the Summer of 1983 at which time a report of their findings will be published.

Phase II of the new Communications System, including computer-aided dispatching, was delayed pending resolution of City of Toronto Policy on Canadian content. This has since been resolved and tenders for the C.A.D. System have been prepared and released for prospective bidders. Phase I is fully operational and personnel have utilized the radio network in such a manner it is difficult to perceive how we persevered for so many years with less adequate communications.

On October 21st, 1982, the Quarter Century Club and the City of Toronto played host at a dinner to honour long-term City employees. One hundred and eighty Toronto Fire Fighters who were employed in 1957 during the time of the reduction of the workweek to 42 hours, were recognized and presented with watches and other mementos of their long and distinguished service to their community.

Special congratulations are extended to Toronto Fire Fighter James Bedford for his award of the Ontario Bravery Medal for his valiant rescue of a small boy from a second floor bedroom, in the Bathurst and Queen area. Frequently an extremely demanding job, the satisfaction of saving lives eclipses the risks involved. My appreciation to the members of the Department for the many heroic rescues performed during the past year, in their constant quest to make Toronto a fire safe City.

A natural public service venture for fire fighters to be associated with, is the Wellesley Burn Centre. The Toronto Fire Fighters Association is spearheading the campaign, and along with other Ontario Fire Fighters are endeavouring to raise a large sum of money. A thrill show is planned for October 8th, 1983, at the Canadian National Exhibition Grandstand. I would request all members of the Department to join me in supporting this life saving community project.

Some of the year's more interesting seminars included:

> The Medical Division's Back Care Clinic to prevent the occurrence of back injury and educate staff on the widespread injury problem which touches almost everyone sometime during their life.

continued

A safety Seminar which included a demonstration of glass removal for high rise buildings; a report on the progress of producing safer fire fighting clothing and a study on safety in the work place.

The continued efforts of the Arson Awareness Committee to conduct Spring and Fall seminars has widened the information resources of this effective group.

Several seminars on combatting the problems of hazardous materials in fires and transport were conducted to further the fire fighters ability to handle these potentially dangerous risks.

As the Fire Chief representing a major urban Fire Department I have been requested to serve on several fire councils and committees to present the concerns and suggested solutions for attacking the fire problem. My absence from the City and the additional workload I assumed was only possible because of the efficient and co-operative manner in which all personnel responded to the challenge of ensuring that the Toronto Fire Department keep its place at the top. Many thanks are extended to all for your loyal and continuing assistance.

In my capacity of President of the Canadian Association of Fire Chiefs I was privileged to head a Science and Technological Exchange Mission to the People's Republic of China. Our tour to the cities of Beijing, Shanghai, Tianjin, and Guangzhou included visits to municipal fire brigades, plant fire brigades and research institutes. The purpose of this reciprocal exchange mission was to improve the level of understanding between our two countries and to share experience and technology in fire prevention and protection matters. Our Delegation was also fortunate in being able to visit with the Hong Kong and Tokyo Fire Departments. We expect a delegation from the People's Republic of China to visit us during the Fall of 1983, and I request that the Toronto Fire Department extend them a cordial welcome.

It is a pleasure to welcome Deputy Chief Walter Shanahan and Assistant Deputy Chief Joseph Underwood to their new positions. Their proven executive ability and ingenuity will be of benefit and assistance to the Department.

May I also take this opportunity to thank Deputy Chief Norman Cassidy and all Members who retired during this past year for their many years of dedicated service.

DIVISIONAL STAFF

FIRE CHIEF BERNARD A. BONSER

Deputy Fire Chief Walter J. Shanahan

Assistant Deputy Fire Chiefs

William T. Sproule — Joseph F. Underwood

Platoon Chiefs	4	District Chiefs	36
